

HOBO® T-EG-x000-2775 Sensor

Rogowski Coil Sensor

Rope CTs are excellent for bus-bars and large switch-gear applications. Self-powered rope CTs are flexible and easy to install, but will not be accurate below 30A. Each CT includes the two-pin CT connector plug.

Technical Specifications

333 mVrms at rated output Accurate within 1% from 30A to stated current rating 6' twisted pair lead with CT connector
Note: 30A minimum current required at all times. No external integrator required

Supported Measurements:

AC Current and Amps (A)

Key Advantages:

- Designed to be used where regular split core CTs cannot fit
- Simple installation
